

PRODUCT CODE

FOIL-xxx-xxx // FOIL- area covered - voltage

PRODUCT DESCRIPTION

The Cut & Turn Foil panel by Warmup is an ultra thin electric radiant floor heating system designed for use under laminate, carpet, engineered wood and other floating floors. It can be conveniently installed under the floor finish in dry areas without the need for additional earth grids. FOIL panels are 1/8" thick and hardly raise floor levels as they sink into the pad or insulation layer (See WIU). The installation of FOIL systems does not require cementitious adhesives. This is the perfect solution in Sunrooms, basements and bedrooms.

FEATURES

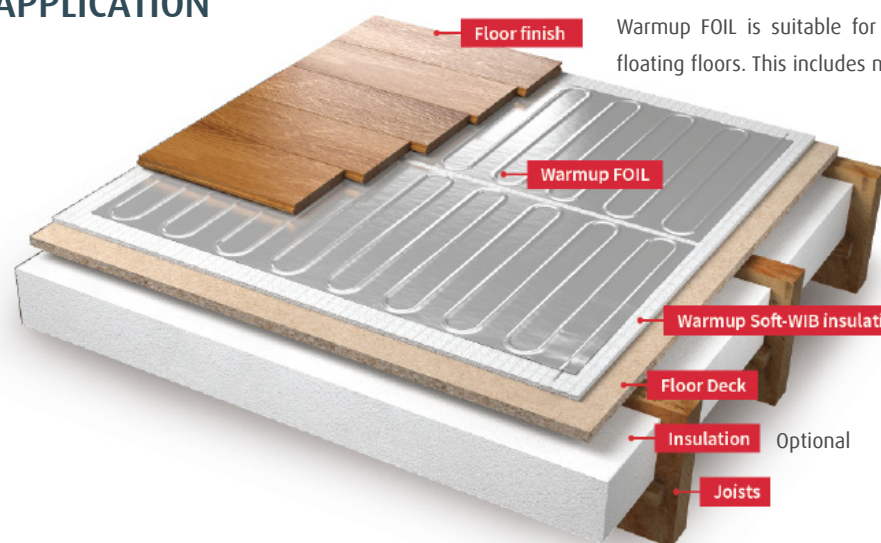

- Installs between the insulation pad and the floor
- Foil won't raise floor levels.
- Aluminum layers spread the heat laterally and prevents hot-spots
- Great for heating under floating floors such as laminate and engineered wood

SPECIFICATIONS

Operating voltage	208V & 240V
Cable thickness	1/8" (3 mm)
Inner insulation	Advanced fluoropolymer (ETFE)
Heating cable spacing	2" (50mm)
Output rating	12 W/sq ft
Cold Tail length	10ft (3m)
Connections	3-core grounded cord attached
Approvals	cULus

APPLICATION

Warmup FOIL is suitable for use with most Carpets, Laminates and Engineered floating floors. This includes many brands of LVT. Call Warmup for compatibility.
