

PRODUCT CODE

WIB-SOFT-1/4-110

PRODUCT DESCRIPTION

Warmup® Insulated Underlay is a thin insulation barrier that reflects heat upwards, making the underfloor heating system more efficient and effective. It also reduces contact noise. The foil backing acts as an effective moisture barrier.

Warmup® Insulated Underlay has been specially developed for installation under Warmup® FOIL systems used to heat rooms under Laminates, floating wood floors, and floating LVT floors.

The WIU can replace typical polystyrene underlayments typically supplied with floating wood and LVT floors.

They should not be used instead of or on top of a carpet pad.

WIU is specifically effective for flooring installed over slab on grade to manage moisture and thermal loss.

FEATURES

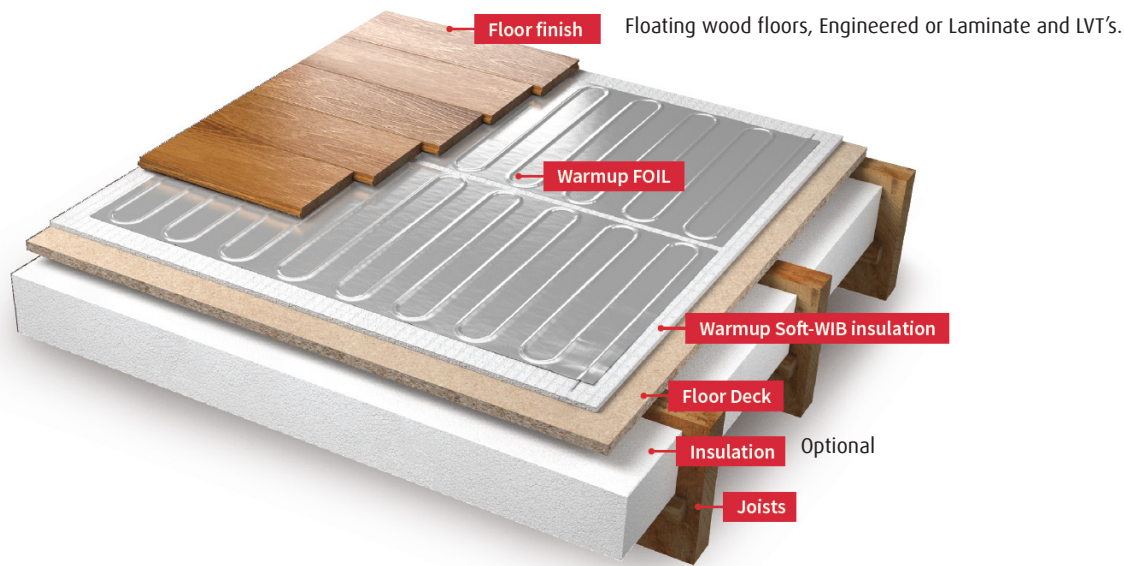

- Resists heat loss and increases the efficiency of the underfloor heating system.
- Extremely effective in reducing contact noise.
- Very thin at only 6mm thick
- Lightweight and easy to install.
- Foil backing acts as a moisture barrier.

SPECIFICATIONS

Size	Width - 4ft Full Roll: 110 sqft
Thickness	1/4"
Composition	Top Layer: Grooved polystyrene

APPLICATION

Under Laminate: use directly on subfloor with Warmup FOIL heaters over the underlayment. While not required, an 1/8" polystyrene foam can be applied over the FOIL heaters to improve plank leveling and noise canceling.

PRODUCT LISTING

Code	Optional Insulation
WIB-SOFT-1/4-110	Warmup Insulation Underlay. Comes in 110 sqft rolls.

WARRANTY & MAINTENANCE

No maintenance required.
