

PRODUCT CODE

NADCM-WP-KIT

PRODUCT DESCRIPTION

Warmup's 3-ply waterproof membrane protects floors and walls under thin-set tile installations from substrate cracks and moisture migration. It is comprised of 2 outer polypropylene layers and one inner polyethylene waterproofing membrane and exceeds testing requirements per ASTM 118.10. The kit includes a 35ft roll of 5"-wide membrane, along with 2 outer corners and 6 inside corners to complete waterproofing in most common bathrooms under 100 sqft.

DIMENSIONS

Roll	35' x 5"
Inside corner (6/kit)	115 mm x 115 mm
Outside corner (2/kit)	105 mm x 105 mm

APPLICATION

Warmup's waterproof membrane is recommended in wet areas such as bathrooms and showers and is designed to be used in conjunction with the NADCM series of Warmup membranes and heating systems (DCM-PRO).

- Apply on wood and cementitious substrates prepared for tile floors.
- Suitable for bathrooms, kitchens, showers and wet rooms in residential and commercial environments.
- Suitable for exterior applications on balconies and terraces.
- Can meet requirements of high moisture stress classifications (swimming pools) with appropriate sealants.

STORAGE

Store in cool and dry place, protect against sunlight, use within 24 months of receipt.

INSTALLATION

Apply the membrane with modified thin-set onto subfloor. As needed, mark areas where membrane will join on the floor in order to tape all seams and wall connections. Tape all wall surrounds by bending the tape at midpoint. Use corner pieces where suitable. Apply DCM-PRO membrane with thin-set ensuring that all seams are situated over waterproofing tape. Press down with lightweight roller, or manually with flat rubber trowel.

TECHNICAL SPECIFICATIONS

Temperature resistance	-22F/-30C to +194F/90C
Thickness	0.5 mm
Weight	.2 lbs/sqft, 307 grams/meter
Bonding Strength	0.2N/mm ²
Fire Classification	B2

WARRANTY

When installed according to the installation manual, the NADCM-WP-KIT is covered with Warmup's 5-year manufacturer warranty.

TECHNICAL SUPPORT
